

Connecting with your treatment team has never been easier

Keeping you and our community healthy and safe, as well as maintaining mental well-being, have always been and remain our top priorities. As we face challenges presented by COVID-19, we also strive to provide the care and support you and your family need to stay healthy — physically, mentally and emotionally.

Telehealth Services and Programs

We've transformed our outpatient programs to a virtual platform until further notice, so that patients wishing to participate may do so through the use of telehealth. This HIPAA-compliant format allows you to see and speak with a Nurse or Therapist just as you would during an in-person session — all in real time, respectful of social distancing practices.

Telehealth offers remote access to treatment services, including:

- Partial Hospitalization Programs (PHP): in this short-term program, patients can work through issues in group therapy with peers who face similar challenges.
- Intensive Outpatient Programs (IOP): typically half-day programming a few times a week, patients have the ability to maintain responsibilities while still continuing with intensive treatment.
- Individual, Group and Family Behavioral Health Video Sessions with Therapist

To learn more about eligibility for Telehealth or to schedule an appointment, please call
